POT GROWN EVERGREENS

We offer the following list of Evergreens grown in 2½-inch pots and they have been hardened by being placed outside during the past Winter. They are now ready to start growing this coming season with such vigor as will surprise you. They are not like the other kind you have been getting that require two years to become established and ready to grow, after a loss of fully Fifty Per Cent.

We ship these with pot-ball attached, each wrapped separately in paper and if planted promptly when received, and given ordinary care, you will not lose a single plant.

They are good stocky plants, from 5 to 10 inches high, with a whole pot-full of roots attached.

Look over this list of varieties, as it contains all the good reliable ones. We do the experimenting, and if not found suitable for this section, we discard them.

Let us have your order now. We will reserve the stock and ship when directed. Get some of the good ones while they last. As far as is known to us, this is the only lot, grown in this manner, to be found in the United States.
